NAIL SPA

Natural Build & Grow Gel

The gentle soak-off builder gel for strengthening and extensions – supports natural nail growth, self-levelling, HEMA-free and in 31 soft spa shades.

HEMA-FREE • VEGAN • SOAK-OFF • NO-FILE • LED/UV

COLOUR CHART & PRODUCT INFORMATION

30 ML · 250 ML · 3000 ML

NAIL SPA · NATURAL BUILD & GROW GEL

Build up. Let it grow.

HEMA-free. Strong. Naturally beautiful.

NAIL SPA Natural Build & Grow Gel is a **HEMA-free** LED/UV builder gel with an easy-flowing texture – ideal for natural nail overlays as well as extensions.

In strength and results it matches well-known BIAB gels ("Builder in a Bottle") and often outperforms them. It gives the natural nail noticeably more stability, helping it grow out naturally.

The self-levelling gel flows evenly on its own and is easy to apply – so beginners and experienced professionals alike achieve reliable results. Removal is simple: it soaks off.

SUITABLE FOR

Natural nail overlays · extensions with tips · forms technique · babyboomer & French · coloured overlays as a base

PROPERTIES

- **HEMA-free**
  formulated without HEMA
- **Vegan**
  no animal-derived ingredients
- **Soak-off**
  removes without residue
- **No-file**
  no filing needed, depending on the finish
- **Self-levelling**
  flows evenly, minimal correction
- **Easy-flowing**
  low viscosity, precise control
- **UV filter**
  protects against discolouration
- **LED/UV from 60 s**
  reliable curing
- **Long wear**
  14+ days with soak-off technique · 4+ weeks possible with base gels

STEP BY STEP

Application

01 **Prepare the natural nail**

Gently buff the nail surface until all shine is gone. Then apply EuBeCos Nail Prep to dehydrate and degrease the nail plate.

02 **Build adhesion**

For best results, apply a thin coat of Ultrabond (see recommendation below) and let it dry for about 30 seconds. A slight tackiness remains – this is intended.

03 **Apply the gel**

Spread a thin layer of NAIL SPA Build & Grow Gel over the entire nail, working carefully so no gel runs into the cuticle area.

04 **Optional: add strength**

For extra strength or a nicer shape, place an additional bead of gel in the centre of the nail and distribute it evenly.

05 **Cure**

Cure for at least 60 seconds in an LED/UV lamp. Highly pigmented shades may need a second cure.

06 **Seal**

Finish with a EuBeCos Top Gel of your choice and cure as recommended for that product.

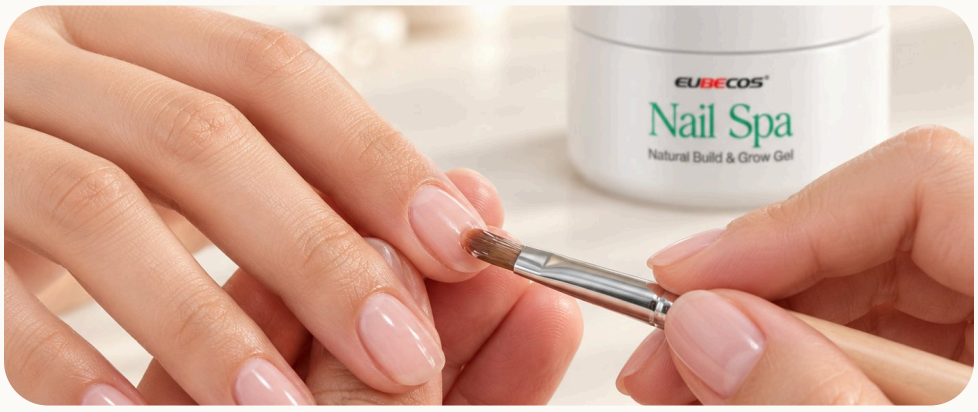
REMOVAL

File the surface and soak the nails in UV Gel Remover. Every 4–5 minutes, take the fingers out and gently push off the loosened gel with a pusher or orangewood stick without damaging the natural nail. Repeat until the gel is completely removed.

GOOD TO KNOW

Shade: The shade in the jar may differ slightly from the cured result – the cured colour is what counts.

Layer thickness: Two thin layers are better than one thick layer – this keeps the heat build-up comfortably low.



Less filing, more relaxing.
