THE SYSTEM

Shellac PRO GelPolish

A highly flexible UV/LED gel polish based on the shellac principle: brilliant colour, mirror-like shine and long-lasting wear – yet quick and gentle to remove with the soak-off method. All colours share the same formula: HEMA-free, vegan and flexible.

APPLICATION

1. Lightly buff the natural nail, remove dust and dehydrate the nail plate.
2. Apply a thin layer of base and cure in the LED/UV lamp.
3. Apply a thin layer of colour and cure for at least 60 seconds. Add a second layer for full coverage.
4. Apply top and cure – depending on the top gel, wipe off the tacky layer afterwards.

REMOVAL

1. File off the shiny top layer.
2. Soak the nails in remover for approx. 5–10 minutes.
3. Gently push off the loosened polish with a rosewood stick; repeat if necessary.

Curing time depends on the lamp, light intensity and layer thickness.
